

Little Sewickley Creek Watershed Association BioBlitz

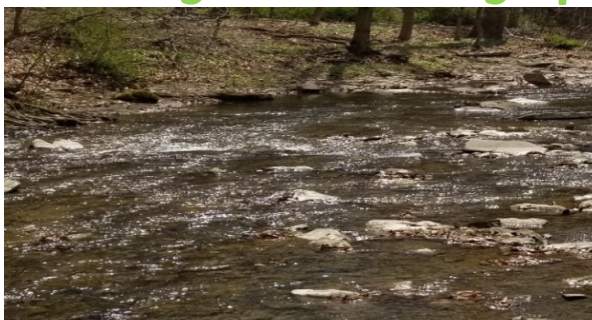

Sunday, April 27 - Walker Park - Shelter 4
All Ages - Free - No Registration Required

All Day:

- Look for Creek Critters in the beautiful Little Sewickley Creek as it flows through Walker Park. Dip nets and cups will be available to borrow.
- View the spring wildflowers that are in bloom.
- Use the iNaturalist app to identify the organisms that you find. They will automatically be added to our BioBlitz Project. (If you don't have the app, it would be helpful to download it before Sunday.)

8:00	Birding Join Cindy, a local birder, to help identify the birds.
9:00	Beaver Dam Walk We will carpool for a short drive to the trailhead. You can take a shorter or longer walk depending on how much you want to see of the beavers' work. Steve will also share his video at the shelter.
10:00	Mushroom Walk Dawn Wehman is an identifier with the PA Mushroom Club who will be looking for spring mushrooms.
11:00	Beaver Dam Walk See 9:00.
12:00	Plants, Creek Critters, and Lunch Bring a picnic lunch to refuel! When you are done eating, join others looking for plants on land and critters in the creek. If you have boots, bring them since the water might be chilly. Or you can wear water sandals.
1:00 and 2:00	Fish Walks Dr. Brady Porter will be teaching people how to find and identify fish. BRING CHEST or HIP WADERS if you have them and WOULD LIKE TO PARTICIPATE IN ELECTROFISHING. This will take place in Morrow-Pontefract Park, closer to the river.

Bring water, bug spray, sunscreen and curiosity!
